Application for an Operating Permit for Potentate Mining, LLC., in Granite County

Potentate Mining, LLC (Potentate) has filed an application with the Department of Environmental Quality for an operating permit under the Metal Mine Reclamation Act. The operating permit would authorize a placer mine operation for the purpose of recovering sapphires and a minor amount of placer gold.

The proposed site is located about 22 miles southwest of Philipsburg, MT in Section 15, and parts of Sections 16, 17, 20, 21 and 22, Township 6 North, Range 16 West, in Granite County for a total permit area of about 2,800 acres.

Potentate currently operates in these locations under an exploration license and Small Mine Exclusion Statement and needs an operating permit due to proposed expansion of the site. Potentate proposes to disturb approximately 2,321 acres over a life of mine of about 30 to 40 years. The site is on private land and would employ up to 24 full and part time employees.

The application can be viewed by the public at the DEQ office located at 1520 E. 6th Ave., in Helena, MT. For further information please contact:
